Subject: RE: GaN Meeting in Feb

Hi Patrick,

Veeco allowed me to take hand written notes of the recipe details while the process was running. They also said they will send a process engineer to Singapore to help us start the GaN-on-Si process.

Shane

Shane,

The other thing we need to study (especially WeiZhu and yourself) is on the Veeco's Process Recipes (Did you get these?). And If some of you have the process module review for GaN MOCVD growth. It would be good if we can rehearsal for WeiZhu before Michael's visit. He needs confidence on our team.
